

Baycrest
Ontario

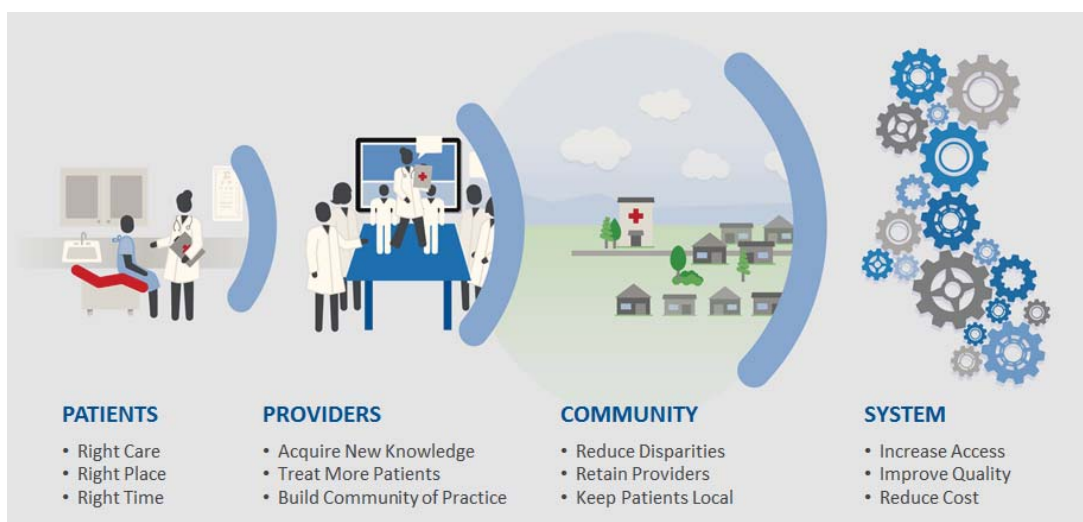

Baycrest Health Sciences, in partnership with North East Specialized Geriatric Centre, is running Cycle 1 of Project ECHO Care of the Elderly (ECHO COE), a telehealth program that aims to help primary care providers build capacity in the care of older adults through weekly 90 minute videoconference sessions.

ECHO Care of the Elderly

What is ECHO?

ECHO is a 'Hub' and 'Spoke' model of knowledge dissemination and capacity building, which aims to spread knowledge between Academic Health Science Centres and the frontline of community care. Project ECHO® was created by Dr. Sanjeev Arora at the University of New Mexico in 2002 and has grown to over 130 hubs around the world.

This project is fully funded by the Ministry of Health and Long-Term Care and does not require any payment from primary care provider sites. Participants may qualify for continuing professional development credits.

ECHO COE Cycle 1 Sessions will be held weekly on Wednesdays from 4-5:30 pm, from April 11, 2018 to July 18, 2018.

The 90 minute sessions include a 15-20 minute didactic presentation related to care of older adults, followed by one to two de-identified patient case presentations by participants.

ECHO Sessions will include didactic presentations on topics such as:

- DEMENTIA - SCREENING AND DIAGNOSIS
- RESPONSIVE BEHAVIORS
- MOOD DISORDERS
- FALLS
- SLEEP DISORDERS
- PAIN
- INCONTINENCE
- MEDICATION MANAGEMENT
- MOVEMENT DISORDERS

Cycle 2 will be held in September 2018, dates and times to be determined.
