Ageism in an Aging Society: The Role of Knowledge, Anxiety about Aging, and Stereotypes in Young People and Adults

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6517915/>

This study aimed to investigate the simultaneous relationships between knowledge, age, anxiety about aging, and stereotypes toward the elderly, as well as their predictive roles with respect to ageism. (OPEN ACCESS)

Interventions to Reduce Ageism Against Older Adults: A Systematic Review and Meta-Analysis

<https://ajph.aphapublications.org/doi/full/10.2105/AJPH.2019.305123>

Research has found a strong link between ageism, in the form of negative stereotypes, prejudice, and discrimination toward older people, and risks to their physical and mental health. This study assessed the relative effects of three intervention types designed to reduce ageism among youths and older adults. (OPEN ACCESS)

Determinants of Ageism against Older Adults: A Systematic Review

<https://www.mdpi.com/1660-4601/17/7/2560>

Ageism is a widespread issue and contributes to the threat to an older person's well-being. This study gathered and summarized empirical studies exploring key determinants of ageism against older adults for a period of over forty years (1970 – 2017). (OPEN ACCESS)

Effect of Ageism on the Digital Divide Among Older Adults

<https://pdfs.semanticscholar.org/91b9/8455ddbd097334add36b0ca611d572738dd6.pdf>

This study reviews the literature on ageism and on technology adoption for older adults. It also expands the literature by discussing why ageism may also contribute to the digital divide among older adults. (OPEN ACCESS)

Ageism among Health Care Providers and Interventions to Improve Their Attitudes Toward Older Adults: An Integrative Review

<https://journals.healio.com/doi/abs/10.3928/00989134-20120307-09>

The purpose of this study was to review the literature on ageism among health care providers and assess interventions used to improve their attitudes toward older adults. (OPEN ACCESS)

Ageism

Reducing Ageism: Education About Aging and Extended Contact with Older Adults

<https://academic.oup.com/gerontologist/article/59/3/580/4641808?login=true>

Ageism has become an increasing concern due to the growing older population worldwide and its youth-centered focus. This study sought to investigate the PEACE (Positive Education about Aging and Contact Experience) model to reduce ageism. (OPEN ACCESS)

Ageism and Psychological Well-Being Among Older Adults: A Systematic Review

<https://pubmed.ncbi.nlm.nih.gov/35434202/>

Ageism may harm older adults' psychological well-being, leading to mental health issues, such as depression and anxiety. This study examined qualitative studies of the relationship between ageism and the psychological well-being of older adults. (OPEN ACCESS)

Addressing stereotype of aging and interest in careers working with older adults through education

<https://pubmed.ncbi.nlm.nih.gov/33280539/>

Building on the PEACE model (Positive Education about Aging and Contact Experiences), this study sought to challenge stereotypes, provide more positive and accurate views of aging and older adults, and increase interest in careers working with older adults. (OPEN ACCESS)

The efficacy of a video-based intervention to reduce ageism among long-term services and support staff

<https://pubmed.ncbi.nlm.nih.gov/33497313/>

Research has shown that ageism can act as a barrier to one's quality of life and quality of care delivery within the continuum of residential care settings. The purpose of this study was to examine whether a one-hour-video-based intervention designed to address ageism could decrease self-reported ageist attitudes and behaviours among the staff of long-term service and support settings. (OPEN ACCESS)

Addressing ageism using intergenerational performing arts interventions

<https://www.tandfonline.com/doi/abs/10.1080/02701960.2020.1737046>

The purpose of this study was to examine how, and if, intergenerational performing arts interventions addressing age increases knowledge on ageism and counters ageist stereotypes. (OPEN ACCESS)

Ageism

'I decided to attend to him because it's my duty': Student Nurses perception and attitude towards care of older adults and society

<https://www.proquest.com/docview/2621034567/376BF9CD372B4D06PQ/4?accountid=6180>

Nurses' perceptions and attitudes toward an older patient can positively or negatively influence the quality rendered. This study aimed to explore students' perception of aging and their attitude towards the care of older adults. (OPEN ACCESS)

COVID-19 and ageism: How positive and negative responses impact older adults and society

<https://pubmed.ncbi.nlm.nih.gov/32672988/>

This article sought to examine positive and negative responses toward older adults during the pandemic and the consequences for older adults and society using data from the pandemic as well as empirical research on views and treatment of older adults. (OPEN ACCESS)
